Re: Dr. Edgar Mitchell requests a phone appointment to discuss Disclosure of the Extraterrestrial Presence

Dear John Podesta:

Congratulations on your recent appointment as counselor to President Barack Obama. Now within the Obama administration, you are in the unique position to address disclosure of the extraterrestrial presence in a manner that promotes science, technology, peace, Earth sustainability and space.

John, I would like to schedule a phone conversation at your earliest convenience to discuss what I feel are intensifying imperatives for extraterrestrial disclosure.

For many years you and I have shared a mutual vision of disclosure. I highly commend your public record urging disclosure which includes the forward you wrote for Leslie Kean's book and your call for the Pentagon's release of 25 year old classified government papers on UFO investigations. When our government releases this classified information we become the twenty-fifth country to make public disclosure.

You and I also share a mutual vision for earth sustainability apparent in the escalating demand for a change in global energy policy. Our phone discussion will also include the zero point energy research and applications developed by my Quantrek international science team. Advanced energy science is linked to consciousness research and public disclosure of the extraterrestrial presence.

Global consciousness remains one of my top priorities. I envision our species entering deep space as advanced, cooperative, consciously aware and nonviolent. We are not alone in the universe. How we relate to other intelligent life matters. Understanding how nonviolent ETI from the contiguous universe travel to Earth by means of zero point energy is key to our acceleration as space-faring humans.

Thank you for letting me know your availability for our phone call. Rebecca Hardcastle Wright, our Washington DC representative for Quantrek, will be in contact with Eryn Sepp regarding scheduling.

Best regards,

Edgar

Edgar D. Mitchell, ScD
